

Our Philosophy

At Mount Carmel Animal Hospital we are committed to providing comprehensive, high quality healthcare for our patients to enhance their well-being and quality of life. We achieve this goal by having a compassionate knowledgeable staff, utilizing the latest technological advances and implementing foremost medical practices. It is our goal to educate and involve our clients in a lifelong healthcare path for their beloved family members.

From our Owners

Our innovative approach to veterinary healthcare encompasses the life of your furry family member from puppy/kitten exams to comprehensive senior screenings. We recognize that pets are family and treasure and honor that bond. Our clients are our friends, not just our customers, and we value the trust that comes hand-in-hand with those relationships.

We pledge to provide the highest quality veterinary care our patients and the finest customer service to our clients.

From routine to advanced care, we are proud to offer the very best in veterinary medicine. On behalf of our entire staff, we welcome you to our hospital and look forward to establishing a lasting relationship with you and your pets.

Sincerely

Pat Steele
Paul Fox

We are committed to providing top quality comprehensive health care to your pets.

To achieve this we

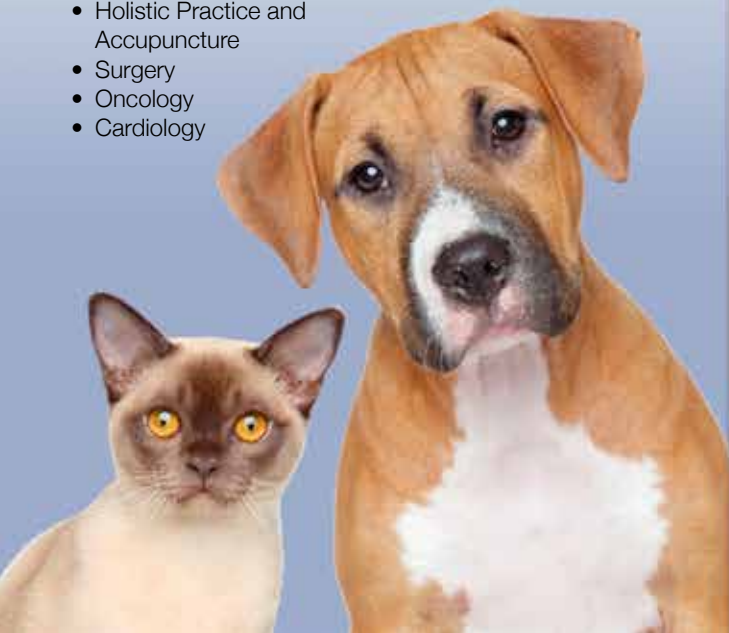

- Treat our patients as if they were our own pets and offer superior service
- Provide quality medicine tailored to the specific needs of your pet
- Are dedicated to client education and providing you with information to make appropriate decisions for your animal companion
- Focus on prevention, management and treatment of pain

Our Professional Staff

Our professional staff is compassionate, knowledgeable, and provides exceptional medical care. We participate in continuing education and conduct regular staff training as a means to guarantee the best possible care for our patients. Training also allows us to be aware of the rapid and ever changing advances in veterinary medicine.

- Ultrasonography
- Canine Rehabilitation

SURGERY: We perform a variety of surgeries. To ensure safety, all surgical patients are watched with state of the art monitoring and vital support equipment. We also use the services of a mobile surgical specialist who can perform non-routine and orthopedic surgeries at our facility.

PAIN MANAGEMENT: We take pain relief very seriously and employ preventative pain management strategies using local anesthetics, anti-inflammatory drugs, and other analgesic medications for all surgical procedures, wounds, dental extractions and arthritis related issues.

ULTRASOUND: We perform advanced abdominal and heart ultrasounds at our office in order to rapidly diagnose and help treat many conditions. These scans are performed and interpreted both at our hospital and can also be electronically sent to specialists for further interpretation.

PROGRESSIVE DENTAL CARE: Periodontal disease is the number one health problem in cats and dogs over three years old. Dental disease can lead to serious liver, kidney, and heart disease. We provide an extensive dental care program and use the safest anesthesia along with advanced monitoring, digital dental xrays, fluoride treatment, ultrasonic scaling and polishing. Preventative dental care may add years to your pets' lives while improving their quality of life.

CANINE REHABILITATION: Our program uses a variety of therapeutic exercises and modalities to improve function and promote healing. Our goal is to improve the condition of our patients through the use of our heated underwater treadmill, cold laser, ultrasound therapy, electrical stimulation, manual exercises and other therapies. Our patients

include pets with the following issues: post operative orthopedics, spinal cord injuries, arthritic pets, obese pets, canine athletes, working dogs and many more.

WEIGHT LOSS PROGRAM: Fit pets live a longer and healthier life! Our Purina Project Pet Slimdown certified weight loss coach will design a plan to get your pet to a healthy weight. Our coach will calculate the caloric intake necessary for weight loss and set and monitor goals. Exercise programs may include workouts on our underwater treadmill and routines to practice at home.

LASER THERAPY: We offer cold laser therapy. This non-invasive tool helps reduce pain and inflammation and increases the speed of healing from wounds and surgery.

DIGITAL RADIOGRAPHY: Digital radiography provides high quality radiographs to aid in the diagnosis of many issues. Images are captured quickly and with lower doses of radiation. We also have the capability to electronically send copies to our peers for further review.

HOLISTIC MEDICAL CARE: Holistic therapies are those that take the whole patient into account when prescribing, and that encourage the body to call on its own recuperative powers to heal. Holistic medicine is individualized for each patient and treatment may include acupuncture, chiropractic manipulation and herbal medicine.

ONCOLOGY: Through advanced ultrasound, x-rays and biopsy techniques we diagnose many types of cancer. We also offer a variety of treatment options including surgery, chemotherapy to help extend your pet's quality of life.

Emergency services

Please call us if you are experiencing a medical emergency. During hospital hours, we can accommodate your pet to be seen as an emergency appointment. After hours, one of our doctors will be available by phone to help you determine whether your pet can be treated at home or should be taken to a local pet emergency hospital.
