

Canine Life Skills Class Registration

About the Return of Canine Life Skills Classes and COVID-19

Mount Carmel Animal Hospital is pleased to announce the return of Canine Life Skills courses. Courses will be offered on a limited basis due to the ongoing COVID-19 pandemic. We hope to be able to return to wider offerings in the future. At this time, we are focusing on basic skills for puppies and young adult dogs who may have missed training opportunities over the last year.

Through the summer of 2021, we will be offering group classes for puppies and young adult dogs up to 2 years of age. We hope to resume expanded offerings for individual classes and adult dogs in the future. Each course will consist of four 1-hour sessions. Registrants must attend the sessions for which they are registered, with no make-up or alternate sessions available due to demand. Please be sure to register for a session that meets your schedule. Please be sure to register for a session that does not conflict with any planned spay/neuter surgery and allows two full weeks of recovery.

While our training area is spacious, it is not tied into our HVAC system and therefore, fresh air does not circulate in this area.

By registering to participate in Canine Life Skills classes, I understand and agree to the following COVID-19 safety protocols:

- ✓ I am the adult handler who will attend classes with my dog.
- ✓ I am FULLY vaccinated against COVID-19 (two weeks since completion of vaccine series).
- ✓ I will wear a mask while indoors. Mask will be worn so that it covers both nose and mouth.
- ✓ If I feel, unwell, I will not attend class. If my dog is unwell, I will not attend class.
- ✓ No make-up sessions are offered, and I am not able to attend sessions for which my dog and I are not registered.
- ✓ I have/will provide proof that my dog meets the following health conditions:
 - Vaccinations: Rabies (by age 4 months), DHPP or DHLPP (Canine Distemper), Bordetella (Kennel Cough)
 - Fecal testing with negative results (free of parasites) within last 12 months
